PSWB01 Interview Simulation Software — Board Room Assessment Dossier

Candidate Assessment Summary

Candidate Name:	Dr. Aarav Sharma	Target Post:	Scientist B
Candidate ID:	cand-001	Report ID:	report-cand-001-post-scientist-b-ai
Generated Date:	27/9/2026	Questions Evaluated:	10

FINAL WEIGHTED SUITABILITY SCORE

75.5%

VERDICT: RECOMMENDED

Scoring Rubric Breakdown (Exact Configured Weights)

EVALUATION DIMENSION	WEIGHT	SCORE
Question Relevance (AI Semantic)	10%	70%
Answer Relevance (AI Semantic)	25%	34.69%
Technical Knowledge (Expert Panel)	35%	92.88%
Depth & Completeness (Expert Panel)	15%	89.13%
Communication Clarity (Expert Panel)	10%	94.38%
Consistency & Alignment (Expert Panel)	5%	91.25%

Question-by-Question Evidence & Expert Remarks

[Q1] (BasicTechnical - Diff 2)

Why did you choose a convolutional neural network for this problem?...

"We selected a Convolutional Neural Network (CNN) because it exploits parameter sharing and tran..."

AI Rel: 34.27% | Concept Coverage: 80% | Tech: 92 | Notes: Strong clarity on spatial hierarchy and parameter sharing advantages of CNNs.

[Q2] (AdvancedTechnical - Diff 2)

What would happen to your model if the training data were highly imbalanced?...

"With heavy class imbalance, a standard cross-entropy loss causes the model to collapse toward t..."

AI Rel: 52.77% | Concept Coverage: 100% | Tech: 90 | Notes: Good understanding of Focal Loss and precision-recall metrics under imbalance.

[Q3] (IceBreaking - Diff 1)

How do you keep yourself updated with the fast-moving deep learning research and open?

"I have a Ph.D. in Computer Science specializing in Deep Learning and Computer Vision. For the p..."

AI Rel: 45.7% | Concept Coverage: 0% | Tech: 95 | Notes: Exceptional clarity and impressive pedigree in deep learning.

[Q4] (ProjectDiscussion - Diff 2)

Explain your computer-vision project and the problem it solves....

"We chose a Convolutional Neural Network (CNN) architecture because localized convolutional kern..."

AI Rel: 29.31% | Concept Coverage: 0% | Tech: 92 | Notes: Clear grasp of inductive bias and parameter sharing in convolutional layers.
